Calcular
$$I = \lim_{\begin{subarray}{c} x \to 4 \\ y \to 4 \end{subarray}} \frac{x-y}{\sqrt{x} - \sqrt{y}}.$$

$$I = \lim_{\begin{subarray}{c} x \to 4 \\ y \to 4 \end{subarray}} \frac{\cancel{(x-y)} \left(\sqrt{x} + \sqrt{y}\right)}{\cancel{x-y}} = \lim_{\begin{subarray}{c} x \to 4 \\ y \to 4 \end{subarray}} (\sqrt{x} + \sqrt{y}) = \boxed{4}$$
