Seja a um complexo, $a=(\sqrt[n]{a})^n, \ n\in\mathbb{N}^*.$

Seja $a = \rho(\cos\theta + i\sin\theta), \ \rho \in \mathbb{R}, \ \rho \ge 0, \ \theta \in [0, 2\pi[,$

$$\sqrt[n]{a} = \sqrt[n]{\rho} \left[\cos \left(\frac{\theta}{n} + \frac{2k\pi}{n} \right) + i \sin \left(\frac{\theta}{n} + \frac{2k\pi}{n} \right) \right], \ k \in \mathbb{Z}$$

$$\left(\sqrt[n]{a}\right)^n = \left(\sqrt[n]{\rho}\right)^n \left[\cos\left(\frac{n\theta}{n} + \frac{2nk\pi}{n}\right) + i\sin\left(\frac{n\theta}{n} + \frac{2nk\pi}{n}\right)\right] = a.$$

Quod Erat Demonstrandum.
