Projeto Mathematical Ramblings

Sejam $z_1 = 1 + 2i$ e $z_2 = 1 - i$. Efetuar $z_1 : z_2$.

$\frac{1+2i}{1-i} = \frac{(1+2i)(1+i)}{(1-i)(1+i)} = \frac{-1+3i}{2}$

$z_1 : z_2 = \frac{-1}{2} + \frac{3}{2}i$
